

PEPPERMINT OIL NATURAL BUG REPELLENT

INGREDIENTS:

2 cups water
10 - 15 drops LorAnn Peppermint Essential Oil

DIRECTIONS:

1. Combine water and peppermint oil in a spray bottle. Shake bottle before use and spray the solution around entry spots such as windowsills and door frames, or places where insects may hide. The strong odor acts as a repellent.

Tip: As an indoor alternative to a spray, add a few drops of peppermint oil directly onto cotton balls and place around your house at those same points of entry.
