### **Statement Regarding Diacetyl**

Flavorings from LorAnn Oils do not contain diacetyl as a direct source ingredient. This means that diacetyl is not added as a flavoring ingredient directly to any of our formulations.

It is also important for LorAnn customers to understand many ketones, such as acetoin, when heated or introduced to other chemicals could potentially create a trace amount of another chemical, such as diacetyl. This would be a result of a chemical or physical reaction of various chemicals of the formulation and would likely not reside in any amounts that would ever present a danger for human consumption.

The information that LorAnn provides regarding our products is the result of work and observations carried out in laboratories and we believe them to be accurate. We make this information available to our customers only to help the user determine the suitability of these products in their process or formulation.

The information we do furnish is given without warranties, expressed or implied. Furthermore, it is the responsibility of the customer to determine the usefulness of our ingredients and their application in his/her process and we assume no liability or responsibility for the result of his/her determination. The suggestions offered by LorAnn are not meant to infringe on existing patents.

#### **Flavors for E-Cigarettes:**

LorAnn Oils does not advertise or promote our flavors for use in e-cigarettes. LorAnn has not tested our flavors as being acceptable for any purpose other than their use as an ingredient to be used in the preparation of foods to be consumed such as candy, cakes, cookies, and ice cream. Those using the flavors in e-cigarettes are doing so at their own risk and without warranty, either expressed or implied, from LorAnn Oils, Inc. or its suppliers.
